### **INTRODUCING THE GLANNA PROGRESSIVE BREEDING SCORE.... Individual Animals**

**Example 1. "WOOL-FRAME" RAM** The animals background scores.

<b>Ram</b>	Wool = 20	Frame = 22.5	Development = 12.5	Score out of 25
<b>Dam (Wool)</b>	Wool = 9	Frame = 5	Development = 5	Score out of 10
<b>Sire (Frame)</b>	Wool = 6	Frame = 9	Development = 6	"
<b>Sire's Dam (Frame)</b>	Wool = 5	Frame = 9	Development = 6	"
<b>Phenotypic Score</b>	Wool = 20	Frame = 22.5	Development = 12.5	@ score out of 25
<b>Genotypic Score</b>	Wool = 10	Frame = 11.5	Development = 8.5	@ score out of 15

Expressed as a score out of 40 The Progressive Animals Score is shown as:

**PBS Wool = 30/40      Frame = 34/40      Development = 21/40**

**Example 2. "WOOL-" RAM** The animals background scores.

<b>Ram</b>	Wool = 25	Frame = 12.5	Development = 6.25	Score out of 25
<b>Dam (Wool-)</b>	Wool = 9	Frame = 5	Development = 2.5	Score out of 10
<b>Sire (Frame)</b>	Wool = 6	Frame = 9	Development = 5	"
<b>Sire's Dam (Frame)</b>	Wool = 5	Frame = 9	Development = 6	"
<b>Phenotypic Score</b>	Wool = 25	Frame = 12.5	Development = 6.25	@ score out of 25
<b>Genotypic Score</b>	Wool = 10	Frame = 11.5	Development = 6.75	@ score out of 15

Expressed as a score out of 40 The Progressive Animals Score is shown as:

**PBS Wool = 35/40      Frame = 24/40      Development = 13/40**

**Example 3. "FRAME +" RAM** The animals background scores.

<b>Ram</b>	Wool = 12.5	Frame = 25	Development = 20	Score out of 25
<b>Dam (Wool)</b>	Wool = 8	Frame = 5	Development = 5	Score our of 10
<b>Sire (Frame+)</b>	Wool = 6	Frame = 9	Development = 8	"
<b>Sire's Dam (Frame)</b>	Wool = 5	Frame = 9	Development = 8	"
<b>Phenotypic Score</b>	Wool = 12.5	Frame = 25	Development = 20	@ score out of 25
<b>Genotypic Score</b>	Wool = 9.5	Frame = 11.5	Development = 10.5	@ score out of 15

Expressed as a score out of 40 The Progressive Animals Score is shown as:

**PBS Wool = 22/40      Frame = 36.5/40      Development = 30.5/40**

**Once the score hits 30 or above for Wool or Frame or 25 or above for development it is considered a influencing trait and defines how the ram should be mated.**

**The Phenotypic Score (what the animal is biologically themselves) has a more significant impact on the result than their Genotype (genetic background) but to discount their background completely is not seeing the whole picture**
